

Sustainable Trade Index **2026**

# Chile

# Sustainable Trade Index

The Hinrich-IMD Sustainable Trade Index measures 30 economies’ readiness and capacity to participate in the global trading system in a manner that supports the long-term goals of economic growth, environmental protection, and societal development.

## Overall and pillars

### Chile

The values in (parentheses) indicate the one year ranking change

## Background information

|                                          |             |        |
|------------------------------------------|-------------|--------|
| Population, millions (2025)              | 20.04       | Medium |
| Income level, GDP per Capita US\$ (2025) | 17,735      | Medium |
| Membership                               | APEC, CPTPP |        |

# Economic pillar

The Economic pillar measures an economy's ability to ensure and promote economic growth through international trade. In this category, economies receive scores for indicators that demonstrate a link between the trading system and economic growth.

Some indicators capture the quality of trade infrastructure, while others measure the ease of conducting international trade. We measure export diversification by evaluating an economy's bilateral trade destinations and how heavily its exports are concentrated by sector. Furthermore, we consider the technological infrastructure and innovation capabilities of an economy by assessing its emphasis on research and development investments and digital technologies.

## Indicators

| 1 Economic Pillar |                                                                                 | Rank | Rank +/- | Value   | Year | Score and 30 country average |
|-------------------|---------------------------------------------------------------------------------|------|----------|---------|------|------------------------------|
| 1.01              | Consumer price inflation                                                        | 24   | (-1)     | 4.20    | 2025 | 74.47                        |
| 1.02              | Real GDP Growth per capita, % GDP                                               | 19   | (-1)     | 1.62    | 2025 | 35.83                        |
| 1.03              | Growth in labor force, %                                                        | 14   | (+3)     | 1.00    | 2025 | 61.68                        |
| 1.04              | Foreign direct investment, net inflows, % GDP                                   | 06   | (0)      | 4.06    | 2025 | 24.59                        |
| 1.05              | Gross fixed capital formation, % GDP                                            | 12   | (+3)     | 24.09   | 2025 | 42.52                        |
| 1.06              | Tariff & non-tariff barriers                                                    | 10   | (-1)     | -       | -    | 85.13                        |
| 1.06.01           | Tariff barriers                                                                 | 12   | (-3)     | -       | -    | 95.74                        |

# Societal pillar

Social factors matter in an economy's capacity to trade internationally over the long term. Economies are measured on the environment that encourages and supports the development of human capital, such as the extent of education and labor standards.

This pillar also captures factors that influence public support for trade expansion. These include income inequality, political stability, goods produced by forced and child labor, and the government response to human trafficking.

## Indicators

| 2 Societal Pillar |                                                            | Rank | Rank +/- | Value  | Year | Score and 30 country average |

# Environmental pillar

The Environmental pillar measures the extent to which an economy's trade supports sustainable resources. The factors include measurements of non-renewable natural resources in trade and the management of externalities that arise from economic growth and participation in the global trading system.

While an economy's capacity to participate in the global trading system is dependent on economic development, achieving sustainable trade requires prudent stewardship of natural resources and limiting externalities in an economy's economic calculus to promote its overall environmental capital. The indicators chosen in this section measure an economy's environmental capital and include indicators for air and water pollution. In terms of future impact, we measure national environmental standards, carbon emissions, and share of natural resources in exports.

## Indicators

| 3 Environmental Pillar |                                                                      | Rank | Rank +/- | Value  | Year | Score and 30 country average |
|------------------------|----------------------------------------------------------------------|------|----------|--------|------|------------------------------|
| 3.01                   | Air pollution, PM2.5 micrograms per cubic metre                      | 20   | (+1)     | 23.10  | 2025 | 73.46                        |
| 3.02                   | Deforestation, Index                                                 | 18   | (0)      | 0.0038 | 2024 | 19.72                        |
| 3.03                   | % of wastewater treated                                              | 09   | (0)      | 87.89  | 2024 | 86.93                        |
| 3.04                   | Energy intensity (Energy use (kg of oil equivalent) per \$1,000 GDP) | 10   | (+5)     | 67.22  | 2024 | 61.00                        |
| 3.05                   | Ecological footprint                                                 | 16   | (+4)     | 3.76   | 2025 | 52.05                        |

# About us

Global trade has helped lift hundreds of millions of people around the world out of poverty. It is a powerful driver of economic growth and job creation. Yet its benefits are not self-sustaining. Without responsible stewardship, trade can widen income inequalities, disrupt labor markets, and impose significant environmental costs. Sustainable trade means striking a durable balance by expanding the economic opportunities that open markets generate while ensuring those gains are broadly shared and maintained. This requires sound public policy, responsible business leadership, and evidence-based frameworks to guide decision-making.

The Hinrich Foundation and the IMD World Competitiveness Center have combined their expertise to build the Hinrich-IMD Sustainable Trade Index, a framework for policy makers, business executives, and civil society leaders to understand and advance sustainable global trade.

**hinrich foundation**  
advancing sustainable global trade

The Hinrich Foundation is an independent Asia-based philanthropic organization dedicated to advancing mutually beneficial and sustainable global trade.

We believe that mutually beneficial and sustainable global trade is a powerful force for shared prosperity, technological progress, sustainability and peaceful international cooperation. Our work is grounded in rigorous fact-based research and the development of innovative trade education programs.

**IMD** / World Competitiveness  
Center

IMD is an independent academic institution with close ties to business and a strong focus on impact. Challenging what is and inspiring what could be, it develops leaders who transform organizations for a more prosperous, sustainable, and inclusive world. Through its Executive Education, MBA, Executive MBA, and advisory work IMD helps leaders and policymakers navigate complexity and change.

The IMD World Competitiveness Center is dedicated to the advancement of knowledge on world competitiveness and offers benchmarking services for countries and companies using the latest data. The Center has pioneered research on how nations and enterprises compete to lay the foundations for future prosperity.
